about us

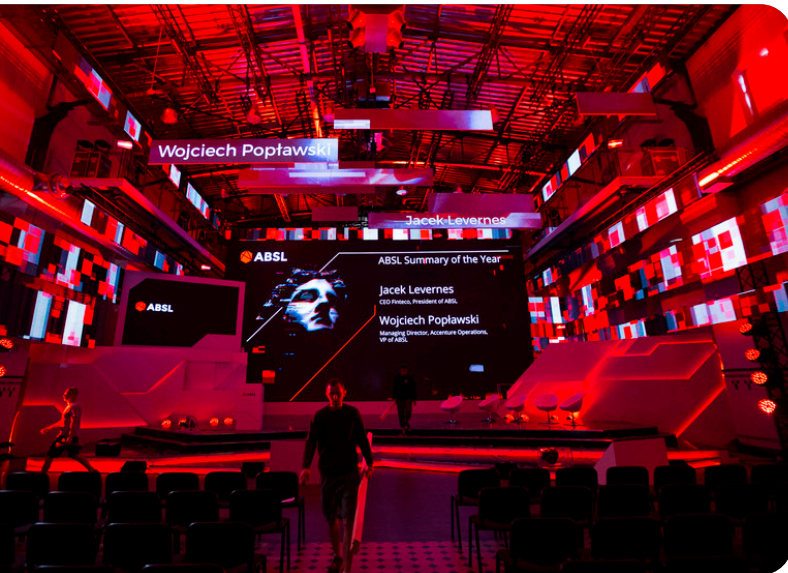

Team

Our team is a group of people passionate about new technologies, multimedia designers, contractors, technicians, who can creatively use event technology and get out of it maximum possibilities. A combination of a team of specialists, their knowledge with technological innovations, enable us to overcome common thinking about event technology.

Creation

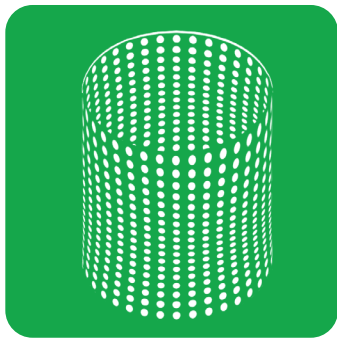

Technologies and ability to use them in an unusual way allow us for realisation of various categories of events in their entirely new forms. Skilled combination of top quality products and searching for new solutions and creating new ideas enable us to make the best out of the equipment, and to deliver our Customers unique formats of visuals.

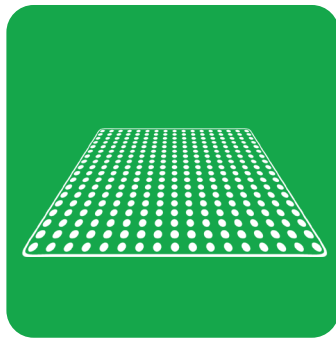

Our technology

LED screens and projection are well-known technologies which, thanks to the combination with technological innovations and stage technology, we can set in motion and achieve unique, since generated in real time, effects. Our event base is not only modern LED screens, projectors, etc. it also means the latest and strongest media servers which change the whole event preparation and implementation process
